Glass Characteristics

Glass has prevalent characteristics such as bubbles, discolored areas, stains and scratches. These are expected, as they are inherent qualities that meet or exceed standard specifications for flat glass ASTM C 1098, heat treated flat glass ASTM C 1048 and laminated architectural flat glass ASTM C 1172. Heat strengthened or tempered glass may have distortions as an inherent quality. Glass with special coatings may require special cleaning, please see AAMA's "Caring for your Windows & Doors" for care and maintenance information. It can be found on our website at www.cws.cc.

This Warranty applies only to the owner of a residential dwelling with installed ENERGY STORMSAVER Vinyl Windows and Doors and is not available for schools, churches and other non-residential dwellings. Should any product covered by this Labor Warranty be installed in a building operated or used for commercial purposes or rental properties such as, but not limited to, schools, churches, government owned structures, office buildings, etc., then this Labor Warranty shall be null and void.
